**Surgeon Coauthors Two Articles on Acromioclavicular Joint Reconstruction  
Published in Medical Journal**

ROCKFORD, IL December 21, 2020 ... Surgeon **Scott Trenhaile, MD** coauthored two papers published in the journal *Arthroscopic Techniques' December 2020 issue.*

Both papers, each regarding acromioclavicular joint (AC) reconstruction. The first, titled "Arthroscopically Assisted Acromioclavicular Joint Reconstruction Using Infinity-Lock Button System With Allograft Augmentation" describes a minimally invasive technique for reconstruction that includes a hamstring allograft that may minimize reconstruction risks of clavicle and coracoid fracture. It also provides stabilization across the AC joint that may help resist naturally occurring displacing forces.

The second technical paper addresses a low profile reconstruction without the allograft. This technique may also minimize reconstruction complication risk of clavicle and coracoid fracture as well as overlying skin irritation.

Dr. Trenhaile's practice at OrthoIllinois focuses on arthroscopic surgery of the shoulder, elbow, and knee, and treatment of sports- or activity-related injuries. He serves as team physician to many local sports teams at the high school, college and professional levels and as Clinical Assistant Professor at the University of Illinois College of Medicine and Assistant Professor, Rush Medical College, Rush University in Chicago, Illinois. Dr. Trenhaile is a frequent speaker and instructor at orthopedic conferences throughout the world and has hosted dozens of international surgeons in Rockford seeking instruction on his advanced arthroscopic surgical techniques. Dr. Trenhaile has been honored with the prestigious peer designation "Best Doctors" over multiple years.

OrthoIllinois serves the Northern Illinois region in multi-specialty orthopedics from offices in Rockford, Elgin, and Algonquin, Illinois and offers a full range of bone and joint care including the additional specialties of podiatry, physical medicine and rehabilitation, occupational health and rheumatology. OrthoIllinois offers the ancillary services of physical therapy, MRI, and an out-patient surgery center. #
