

Suffering an injury or living with a painful condition has a detrimental impact on quality of life and productivity for your employees.

Treatment can then result in costly healthcare claims for your organization. Now, with OrthoCompleteSM Transparent Bundle Program, your company can benefit from transparent pricing for bundled services that removes the complexity and mystery of clinical, diagnostic, and surgical costs for common outpatient bone and joint procedures while providing your employees with the assurance of the highest level of skilled, sub-specialized bone and joint care.

What is bundle pricing?

Significant savings and benefits come with utilizing an ancillary surgery center for same-day outpatient procedures. Bundling those lower facility-related costs together with surgeon's fees and other related costs into a single inclusive price provides the transparency needed to make informed health care decisions.

Employer benefit?

The **single set price** for the services* of a same day procedure, including:

- Surgical implant costs
- Physician fees
- Anesthesiology fees
- Facility fees
