

OUR MISSION

At Orthollinois our mission is to *partner with people to promote and restore active lives*. Our entire Rehabilitation department team, along with our specialty physician partners, work together daily to help each of our patients fulfill this mission.

INDUSTRY LEADER

Orthollinois is the premier provider of orthopedic care at thirteen therapy locations in the Northern Illinois region. We provide physical therapy services in a specialty setting with diverse areas of expertise including sports medicine (overhead athlete, running and biking programs, and return to sports programs), complex postoperative rehabilitation for a wide variety of diagnoses, an outpatient neurologic rehabilitation program, general orthopedics, vestibular rehabilitation, and work conditioning.

COMMITTED TO EXCELLENCE

At Orthollinois we believe that our providers are the key to our patients' success. We employ a Director of Patient Experience to support the practitioners' growth around the patient experience. This includes staff training and participation in the national Press Ganey Survey with high-ranking satisfaction scores. In addition, we provide a comprehensive onboarding and a year long mentorship program that we believe is a vital component to our clinicians' growth, whether they are new to the field of rehabilitation or experienced therapist. The Mentorship program is offered for our PT, OT, and PTA professional staff and is led by experienced trainers. Orthollinois also offers both Annual and Quarterly bonuses for the Rehabilitation Staff based on patient satisfaction goals and achievable productivity standards.

DEDICATED TO PROFESSIONAL GROWTH

Orthollinois offers a generous Continuing Education package as we believe it is key to keep continuing education and professional development top of mind. With a \$2000 yearly stipend, two paid professional continuing education days, and 2-4 sponsored courses a year, clinical staff can truly become experts in their field. Financial support is provided for advanced certification including Manual Therapy Certification, Orthopedic Certified Specialist, Hand Therapy Certification, and PTA Advanced Proficiency Pathway.
